**Subject** Landfill graphs

Greetings – I've been playing around with the temps and seeing what the current data shows (if anything) I'll send you a few of the graphs in a moment. The graph of all wells over time shows the sudden temp changes. The graph of the "fire zone" does show some progression, but I'm confused as to how the fire is spreading. I'm really hoping we will be able to get the animation. I plan to take a look at the pressure and oxygen data this afternoon (minor QA and seeing if anything jumps out).

BTW – I placed the graphs on the spreadsheet (on the H drive). I set up a tab just for graphs.

Take Care,
